The first component is the strengthening public financial management and public service management at central government level, including establishing a functioning system of intergovernmental fiscal relations. The second component is the building public sector and financial management systems at provincial level. This component provides effective and transparent public financial management and public service management capacity at provincial level (including the provision of equipment, etc.) is recognized as one of the most urgent elements of the governance agenda in the DRC. This will pose serious challenges. Apart from addressing weak existing capacities in the 11 provinces, additional efforts will be required to build new public management systems in the new provinces that will be created in the next stage of territorial-administrative reform. It is therefore proposed for this component to absorb a significant portion of the resources allocated to the project. Finally, the third component is the Governance reform implementation capacity. <b>Rwanda, Strengthening Good Governance Program</b>	\$10.26 million	<a href="http://www.undp.org.rw/Governance_Project1.html">http://www.undp.org.rw/Governance_Project1.html</a>	This project aims at strengthening accountability and responsiveness of key state players for delivering the EDPRS objectives. It is also meant to enhance effectiveness and capacities of key national institutions, mandated to promote state accountability and responsiveness". The project is built around a shared agenda between the Government of Rwanda, DFID and UNDP giving weight to the need for good governance – in particular in the development of a responsive and accountable state , a state which enters into a social contract with its citizens, listens to citizens' voice, allows itself to be held accountable for the way in which it develops its policies and delivers its services, and a state which protects and upholds the rights of all. The basic assumption is that good governance is central to the development process, and that it needs state capability, responsiveness and accountability as prerequisites.
